Subject: Federally Endangered Species

Dear Mr. Harrison:

In response to our telephone conversation, I am writing you this letter requesting you to provide us with information on Federally endangered species in the area marked on the enclosed maps.

My company C.C. Johnson & Malhotra, P.C., is investigating various potentially hazardous waste sites in Minnesota. Part of our responsibility is to assess the risk of exposure to Federally endangered species. Accordingly, I would like to find out whether Federally endangered species nest or breed in the shaded area of the maps enclosed. If any do, would you please mark the location of each on the enclosed maps along with the scientific name of the species. The enclosed maps are for:

1. Kittson County, Hallock City area.
2. Clay County, Moorhead area.

If you have any questions regarding these request, please call me at the number below. I thank you for your time and assistance.

Cordially,

Omprakash S. Patel
